产品详情

粮食防漏抓斗

我公司生产的防撒漏抓斗主要用来抓取粮食、玉米、大豆、菜籽、硫磺、化肥等易流动的货物。1，斗体采用大小瓣插入式，通过物料安息角原理来达到防撒漏作用，这种防漏抓斗不好清仓，2。另一种是在普通抓斗的一个斗瓣的横竖刃口板上各帖上一块板子，来达到防漏的目的，这种防漏抓斗好清仓。

The grain guards against leaks the grab

Our company produces guards against scatters leaks the grab mainly to use for the cargo which captures the grain, the corn, the soybean, the vegetable seed, the sulfur, the chemical fertilizer easily and so on to flow.1, fights the body to use the big valvule jack-in type, rests the angle principle through the object to achieve guards against scatters leaks the function, this kind guards against leaks the grab to take warehouse inventory not not well, 2.Another kind is fights the petal in ordinary grab one in any case in the cutting edge panel various placards together the board , achieved guards against goal which leaks, this kind guards against leaks the grab to take warehouse inventory well.
