### Halar Coatings

Halar (ECTFE) has been used successfully in a wide variety of chemical processing applications; and is used extensively as a coating for exhaust duct, vessels and process equipment. Halar coatings has a very smooth surface which helps to reduce the risk of pinholes in the coating while inhibiting buildup and accumulation of particles on the surface. For Chemistries in semiconductor exhaust equipment, Halar provides excellent permeation resistance. Highlights > Halar coatings are resistant to solvents and acids/bases (ph 1-14). They have been successfully used for corrosion protection in the chemical processing industry (CPI) for more than 30 years. Here are a few to mention:

Hydrofluoric Acid

Sulfuric Acid

Nitric Acid

Hydrogen Peroxide

Ozone

Ammonium Hydroxide

All Alkaline Chemistries
