产品详情

Description – Transparent wax solution for forming operations of metals. Applications – Suitable for cold forming of austenitic and ferritic steels, aluminum and its alloys, copper and brass, also as a non-contaminating lubricant in the paper industries and wherever clean lubrication is required; Used successfully for deep-drawing, embossing, stamping, bending, cold extrusion and cold forging of aluminum, for the calibration of metal parts, also for lubricating self-tapping screws, cutting blades, rails, furniture hinges and joints. Features – Extending tool life; Effective even in very small quantities (thin film lubrication); Particularly effective on high-grade steel and aluminum; Pre-treated components can be handled and dispatched without risk of contamination. Composition – Synthetic wax; Corrosion inhibitor; Solvents. Temperature Range – From -60 to +120 ° C
