At the beginning of e-commerce: we switched from offline to online, and the behavior of consumers at that time was that I wanted to shop. It means that I saw a product offline (or saw it on TV and other places), and then went home and searched the product directly on the Internet for purchase. This means that in the early days of e-commerce, the goal of online shoppers is very clear, and Taobao came into being in the early days.

一、拼团返佣金参团方式

预C:100元.500元.1000元

团长发起拼团，人数20人至50人或者设置规定时间成团。

举例:500元产品21人成团。一人，扣除预付款购买产品，并获取公司赠送等值500的欢乐豆。

剩余20人，未获得产品，预付款退回，并获得产品价格30%平均分红。 $20/150=7.5$ 利润。

概率:21人成团率 $1/21$ 。63次参团，3次机会。未次数 $60*7.5=450$ 元。实际花费1050元够买1500元产品，1500个欢乐豆，获取体验团长一次。

体验团长收益，发团金额15%利润。体验团长每日可发团 $100*10$ 次， $500*5$ 次。 $=525$ 元收益。赚取3倍利润4500重新获取欢乐豆参团。

The market has been familiar to consumers. When consumers shop online, they begin to like many comparisons, not only price comparison, but also brand and popularity. It's equivalent to shopping in the supermarket and shopping in the supermarket, and the goods are sold after you go shopping in the supermarket. Tmall and JD.COM are completely on fire at this e-commerce stage!
