产品详情

Slickote Dry Lube 100 is a heat cured, resin bonded solid film lubricant coating which meets the requirements of AS5272 TY 1 / MIL-46010E Type 1.

INTENDED USE

To reduce wear and prevent galling, corrosion and seizure of metals.

Where conventional lubricants are difficult to apply or retain, or where other lubricants may easily be contaminated with dirt or dust.

For sliding motion applications such as plain and spherical bearings, flap tracks, hinges, threads, and cam surfaces.

Where temperature ranges are from -68 deg C to 204 deg C, intermittent exposure to 260 deg C.

When mechanisms are operated at infrequent intervals or are lubricated for life.

Where long term corrosion protection is required under static conditions.

Where solvent resistance is required.

Where extreme heavy loaded lubrication is required including initial startup of heavy loaded mechanisms designed for fluid lubrication.

As a touch up to worn surfaces previously coated with solid film lubrication.
