产品详情

产品简介/Introduction

石英纤维布是通过纺织工艺将石英纤维纱线按一定的组织结构（平纹、斜纹和缎纹）机织而成。

Quartz Fiber Fabric is made by quartz fiber yarn woven into a fabric with predetermined woven structures, such as plain, satin, twill and leno.

产品性能/Properties

可在1050 高温下长时间使用。/High temperature use(1050 long term, higher temperature possible in case of short term exposure)

耐腐蚀。/Resistance to corrosion.

布柔软性好且坚牢度高。/Flexibility, dimensional stability.

高温下强度保留率高。/High temperature strength retention rate.

抗热震。/Thermal shock resistance.

化学性能稳定。/Chemical stability.

电阻率高。/High electrical resistivity.

透波性能好。/Excellent wave penetration.

应用/Application

火箭的隔热防护系统。/Rockets thermal protection system**及航天领域的烧蚀材料。/Ablatives in military and

aerospace (rockets nozzle, aerospace reentry aircraft)导弹、卫星、舰艇和飞行器的天线罩。 /Radomes of missile, airplane, satellite ,ship.电磁窗。 /Electromagnetic windows(jamming and anti-jamming equipment)飞行器、舰艇和潜艇的结构性隐身材料。 /Structural material for stealth technology(aircraft, naval ship, submarine)透波材料。 /Wave penetration materials
