## 前帮机-- shoe machinery

产品名称	前帮机 shoe machinery
公司名称	温州市瓯海娄桥全益制鞋机械厂
价格	.00/个
规格参数	品牌:quanyi 型号:qy-878
公司地址	温州市瓯海区娄桥街道前园村南山路12号旁
联系电话	86 577 86283337 13587729288

## 产品详情

品牌 quanyi 型号 qy-878

功能更完美,技术更先进,效率更高,操作更简便!! 1,鞋面均匀贴紧楦头,绝对不发角,增进美观,提高品质。 2.鞋头压着机构采用可调二段式压力,子母缸设计,使鞋子与扫刀结帮过程中及最后之压着能达到最佳之效 果,确保帮角平整,而且,压头一次压二种压的方式,定压时可使结帮过程平顺:定位时,对比较柔软的皮料,不 容易发生帮距拉长及前档片下拉的现象。 3、每组爪子具独立式自动下拉功能,操作都可视鞋面之松紧度, 选控需要之爪子作自动下拉动作,二下拉之深度并可视需要调整。 4、九爪独立式可个别调整配合任何形 状之鞋头结帮,其自动平衡及扫刀前进时自动下降的原理,更是提高品质增加产量的特性。

- 5、内撑台有两段上升功能供使用,配合后跟顶座工作,可防止鞋楦下滑之现象。
- 6、结帮动作调整不需使用工具,并附有刻度及位置尺指示。
- 7、各种动作功能之选择开关,视操作都需要,可快速切换。 8、辅助扫刀乃是配合九爪式前帮使鞋头结帮 长度加长到前中衔接转角处,经此结帮后,可使鞋头之皮面更贴合与鞋楦。

the design of regulation free of shoe head's pressing stroke supplies surely very stable pressing force ,unaffected entirely by oli temperature and pressure difference .the newly designed for ward-and backward adjusting mcahanism forlast support plates can quickly adjiust the pincers according to the different sizes of shoes . claw-plate's shoes size tegulation uses synchronoua automatic regulating device to make regulation accurate and quickly ,and be able to prevent from producting pleat between claw chink .the desigh of seven-millimeter knife-mould ,joined with nine claw angular device , oiats greatly rakia so that shoe upper is connected firmly ,waist's radian ismore identical with shoe tree and waist's upper is bound easily .all-around forming band specially tracked wipwes ensure uppers more evenly and closely attached to lasts sfter lasting .no protusion will happen; thesurface becomes more beautoful ,and the quality is upgraded.the pressure and speed for each mechanism can be adjusted and the pressure gage is also installed at the outside of the machine which makesthe operation and adjustment more convently
